

GRAND FORMAT - Services

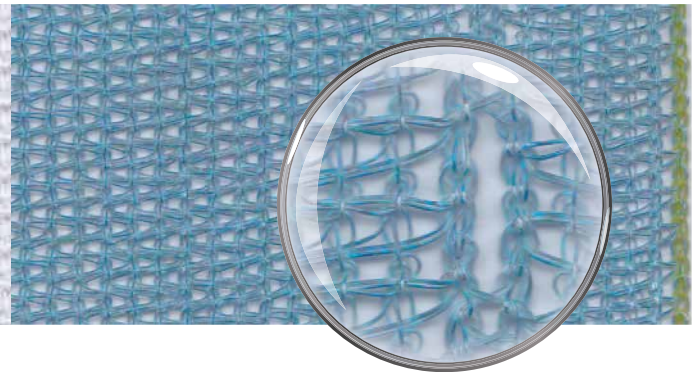

SHADE CLOTH

170GSM + 150GSM

Holes for airflow

Uncoated Stock
Reduced Colour Capability
with print right to the edge

12mm Button holes
(for affixing with cable ties)

DETAILS

- › Blocks 70% of light or 50% depending on stock
- › Print quality ok for basic images, text and logos
- › True solvent printing
- › Hems and eyelets built into fabric
- › Cheapest option

STRENGTHS AND WEAKNESS

- › Good dust containment
- › Cheapest fence advertising option
- › Long outdoor use
- › Easy to install
- › Lowest image quality

APPLICATIONS

- › Temporary and permanent fencing
- › Sports, Music and Cultural Events
- › Construction sites

MINIMUM ORDER

- › Shadecloth must be ordered per roll, it cannot be cut, so minimum order is 50m

PRINT

- › Digitally printed CMYK, as many colours as the customers wants, or black and white if preferred. Though true black is a difficult colour to print, black will not print saturated (please see disclaimer below).

FINISHING

- › Manufactures finishing; Hemmed with button holes.

SIZES

- › Our standard roll is 55 x 1.83m, which allows 50m of printing.

Please be advised that shade cloth with a solid or dark printed background often delivers results that are not expected. It is an extremely absorbent stock and dark colours will not print rich, they are subdued and flat, this is a non coated stock that is meant as a low cost alternative to mesh and this is an unavoidable characteristic of this substrate, due to the knitted weave there may also be ink discolouration or spotting. Please be aware of this fact before placing orders.
