Welded Edges for Reinforcement
(460gsm 50mm Fabric Welding Tape)

DETAILS

- › Blocks 70% of light
- › 270gsm PVC Mesh
- › Good print quality; good detail and colour vibrancy
- › Latex, UV or Solvent print capabilities
- › Welded and eyeleted, plus additional optional finishes
- › Good UV longevity

STRENGTHS AND WEAKNESS

- › Great image quality and endurance
- › Long outdoor use
- › Heavy and difficult to transport
- › Easily creased and damaged
- › Most expensive

APPLICATIONS

- › Temporary and permanent fencing
- › Banners, scaffold and building wraps, crowd control barriers
- › Sports, Music and Cultural Events
- › Construction sites

MINIMUM ORDER

- › There is no minimum banner size, however there is a minimum charge of \$100

PRINT

- › Digitally printed CMYK, as many colours as the customers wants, or black and white if preferred.

FINISHING

- › Our standard finishing on banner mesh is a 50mm reinforced weld with stainless steel eyelets every 500mm on top edge and 1000mm on bottom edge.
- › Other finishing requirements can be applied to mesh such as kedar for sailtrack installations and welded pockets.

SIZES

- › Standard roll sizes are (50m in length): 1.6m, 1.8m, 3.2m & 5.0m
- › Any custom size is possible with banner mesh as we can cut, join and finish the media to any size. An example of a recent custom job was 30m x 30m, which was printed in 6 sections of 30m x 5.0m and weld joined.
- › The customer can also order part of a roll and even just a single piece.

MESH WEAVE
